

## MCLA October 19 & 20, 2015 Guiding Principles Conference

### October 20 Cross-District Data Collection

<b>Identifying and Defining the Guiding Principles</b>	
<b>What are you doing now?</b>	<b>What challenges are you experiencing?</b>
<ol style="list-style-type: none"> <li>1. Practicing SLO development with GP's as our standards K-12 (SAD 40).</li> <li>2. Developing scoring guides for our performance indicators (RSU 14).</li> <li>3. Agreeing on standards and developing performance indicators (Portland).</li> <li>4. Attending an excellent conference on GP's to learn what others are doing.</li> <li>5. Had meetings with many groups to define the GP's – part of our mission statements (RSU 75, Ellsworth, SAD 59).</li> <li>6. Nothing.</li> <li>7. Cross-walking GP's with CTE competency standards.</li> <li>8. Working to transition from Habits of Work to GP's.</li> <li>9. Having struggles with "proof".</li> <li>10. Embedding into curriculum maps.</li> <li>11. Created a proficiency-based task force, in the discovery phase for GP's.</li> <li>12. Draft proficiency scales (AOS 94).</li> <li>13. Using 4 C's to encompass GP's with rubrics; now aligning.</li> <li>14. Creating a capstone project with GP's using Habits of Work.</li> <li>15. Rewritten vision using GP's.</li> <li>16. Creating rubrics.</li> <li>17. We've done learning habits, vision, mission; created GP rubrics and are planning to fold these into classes. Wondering how does this get reported out?</li> <li>18. We still have many different translations. Wondering how this works as students move from school to school?</li> <li>19. Using Marzano's taxonomy to explore how we engage students in learning (SAD 75).</li> <li>20. Developing performance tasks to assess content plus GP's.</li> <li>21. Using the NEASC process for core beliefs.</li> <li>22. Strategic plan is built on the GP's.</li> </ol>	<ol style="list-style-type: none"> <li>1. Unpacking and reorganizing the GP's to make sense to the district.</li> <li>2. Hard to address the value-based aspects of the GP's.</li> <li>3. How to address the issue of integrating them vs. keeping the GP's separate.</li> <li>4. How often to assess? What grade spans?</li> <li>5. Common language – even within the district.</li> <li>6. Balance between student and adult assessment.</li> <li>7. Time and "man" power.</li> <li>8. Lack of a logical system.</li> <li>9. Making teachers consistent without overwhelming them.</li> <li>10. Competing initiatives.</li> <li>11. Wordsmithing too much.</li> <li>12. Community buy-in.</li> <li>13. Student voice.</li> <li>14. GP's were not intended to be standards when they were created. They were meant to guide the standards.</li> <li>15. We've had them since 1997 and they haven't changed that much. What does that tell us?</li> <li>16. Habits of work, GP's, 21<sup>st</sup> Century, 4 C's – are they all the same or not?</li> <li>17. Having students and community understand and see a need for all of this, including GP's, leading to effective self-assessment.</li> <li>18. Where and how does this become inserted into curriculum and reported out to parents?</li> <li>19. Who is doing the work? (GP's identified by a small group, then disseminated to staff?)</li> <li>20. Resource needed that supports awareness of the presence of GP's across all curriculum areas.</li> </ol>

## Teaching the Guiding Principles

What are you doing now?	What challenges are you experiencing?
<ol style="list-style-type: none"> <li>1. Attending a conference!</li> <li>2. Mini-workshops.</li> <li>3. Rewriting mission statement to include GP's.</li> <li>4. Capstone/Senior Exhibition.</li> <li>5. Using GP's in advisory group format.</li> <li>6. WIN time (RTI).</li> <li>7. Creating curricular experiences that deal with GP's.</li> <li>8. Professional development for teachers.</li> <li>9. Discussions with students.</li> <li>10. Using the format and protocols of Restorative Justice.</li> <li>11. Teaching 5 GP's to freshmen, with a focus on collaborative problem solving.</li> <li>12. Connected to mission statement posted in classrooms.</li> <li>13. Through SLO development, having conversations about teaching them.</li> <li>14. Middle School poster activity.</li> <li>15. Creating common language and glossary of terms.</li> <li>16. School-wide employability rubric being changed to include GP's.</li> <li>17. Quest days – experiential learning at middle school.</li> <li>18. Sophomores participate in classroom activity.</li> <li>19. Challenge Day.</li> <li>20. Specifically teaching GP's at primary grades.</li> <li>21. Mentors for Freshmen.</li> <li>22. Capstone project for seniors. (Mt. Ararat)</li> <li>23. Invention convention in conjunction with UMO (Madison Middle School).</li> <li>24. GP's posted in all grades, modeling GP's, using Atlas to support (Ellsworth).</li> <li>25. Restorative Justice at the middle school (Maranacook).</li> <li>26. Using technology as a tool to document progress toward GP's.</li> </ol>	<ol style="list-style-type: none"> <li>1. Conflicting with all other work. Time to do everything.</li> <li>2. Really a K-12 issues, but tends to fall on 9-12.</li> <li>3. Hard to be objective.</li> <li>4. Life-long skills – the journey is never done.</li> <li>5. How to assess/decide – not standardized.</li> <li>6. What do we do when a new student moves into our school/district?</li> <li>7. Pulling apart the components of Habits of Work from the broader GP's.</li> <li>8. Understanding and board support.</li> <li>9. Lack of experience with explaining to get community support and involvement.</li> <li>10. Resources – identifying resources needed and ways to use them effectively.</li> <li>11. Examples/exemplars that are working for others – need explicit teaching help.</li> <li>12. How to integrate with what we're already doing.</li> <li>13. Need a clear connection/crosswalk to content standards to help with transition and explicitly and intentionally teach the GP's.</li> <li>14. Need simplification and clarification.</li> <li>15. GP's are a continuum – not a moment!</li> <li>16. TIME.</li> <li>17. Working on standards first.</li> <li>18. Nothing is easy in the process.</li> <li>19. Variety of audiences K-12.</li> <li>20. Creating unified curriculum.</li> <li>21. So much is involved in teaching a lesson – teachers cannot check 500 boxes on a lesson template.</li> <li>22. Making sure this doesn't feel like an add-on.</li> <li>23. Teacher buy-in and investment.</li> <li>24. Embedding GP's in real world environments: "This is where you'll use them..."</li> <li>25. Consistency of teaching, assessment, and expectations.</li> </ol>

## Assessing and Documenting Proficiency

What are you doing now?	What challenges are you experiencing?
<ol style="list-style-type: none"> <li>1. Capstone project with GP-based rubric.</li> <li>2. Expanding senior project to include community service.</li> <li>3. Identified GP's, performance indicators; working toward rubrics and assessments.</li> <li>4. Habit of Work.</li> <li>5. Informally assessing GP's in the classroom, but there is no formal system available yet to document scores.</li> <li>6. Nothing.</li> <li>7. School-wide Habits of Work rubric.</li> <li>8. Capstone senior graduation project.</li> <li>9. Assess twice a semester; little consistency and evidence.</li> <li>10. K-8 have identified habits of work and report on the report card.</li> <li>11. Working on K-12 continuum.</li> <li>12. Student work portfolios.</li> <li>13. Developed proficiency scales.</li> <li>14. Badging rubrics.</li> <li>15. Exploring how to report, who will assess, and what will be used to collect evidence.</li> <li>16. Students reflect on portfolio at Middle School.</li> <li>17. In the planning stages.</li> <li>18. Assessing Habits of Work.</li> <li>19. Using Jumprope to track.</li> <li>20. Document and aggregate a proficiency score from discrete targets.</li> <li>21. Piloting at high school.</li> </ol>	<ol style="list-style-type: none"> <li>1. Time and capacity.</li> <li>2. Managing and documenting.</li> <li>3. Practicality.</li> <li>4. Having the GP's identified.</li> <li>5. Lots of decisions need to be made.</li> <li>6. How to communicate everything to the community.</li> <li>7. Time for teachers to understand the GP's and learn to model them explicitly for students.</li> <li>8. Seeing the difference between assessing/responding and documenting.</li> <li>9. Documenting progress towards and attainment of GP's is the challenge.</li> <li>10. Too much time documenting evidence vs. teaching.</li> <li>11. Difficulty measuring evidence that takes place outside the classroom.</li> <li>12. Time to create assessments and rubrics.</li> <li>13. Transforming current practice to GP/standards.</li> <li>14. Informing parents and community.</li> <li>15. Need to be transparent.</li> <li>16. How many boxes can be checked off before they lose their true meaning?</li> <li>17. Separating Habits of Work and transitioning to GP's.</li> <li>18. Finding appropriate evidence.</li> <li>19. Quantity of evidence = proficient?</li> <li>20. Tracking it.</li> <li>21. Reporting system.</li> <li>22. Community buy-in, beliefs, and understanding.</li> <li>23. Lacking common language.</li> <li>24. Need shared understanding.</li> </ol>
